

LOGESWARI J

Phone: 9360214921 | Email: loges2503@gmail.com | LinkedIn: [Logeswari J | LinkedIn](#) | Tamil Nadu, India

PROFESSIONAL SUMMARY

Aspiring Software Engineer with a strong foundation in Python, Java, and SQL. Skilled in Data Structures, Software Development, and building real-world applications. Experienced in developing AI-based projects and web applications, with strong problem-solving, debugging, and analytical skills. Eager to contribute to innovative software development projects and scalable solutions.

EDUCATION

B.Tech - Engineering | Kalasalingam University | 2026 Passed Out | CGPA: 7.92

HSC | Noble Matric Higher Secondary School | 75%

SSLC | SBKKSS Thiyagarajan Memorial Matriculation School | 80%

TECHNICAL SKILLS

Programming Languages: Python, Java

Core CS Concepts: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Software Development: Debugging, Code Optimization, Problem Solving, Software Design Basics

Web Development: HTML, CSS, JavaScript, Streamlit

Database: SQL, MySQL

Tools & Platforms: Git, GitHub, VS Code

Machine Learning: TensorFlow, Keras, Image Classification

PROJECTS

AI-Based Plant Leaf Disease Detection System

- Built a CNN-based image classification model using TensorFlow and Keras.
- Developed a Streamlit web app for real-time disease detection.
- Performed data preprocessing, debugging, and validation to improve reliability.
- Added multilingual and audio support for better usability.

Responsive E-Commerce Website

- Designed and developed a fully responsive e-commerce website with product listings, navigation menu, and shopping cart UI.
- Implemented CSS Grid and Flexbox layouts with mobile-first responsive design.
- Optimized the website for different screen sizes using media queries, ensuring seamless performance across desktop, tablet, and mobile devices.

AI-Powered Learning Platform (In Progress)

- Developing an adaptive learning system using AI concepts.
- Designing scalable logic for a personalized learning experience.
- Building backend logic using Python and improving user interface accessibility.
- Supporting functionality checks and continuous improvements during development.
